NOTES

* Rim underlined is measuring rim.
«No bus shall be operated with regrooved, recapped or retreaded tires on the front wheels». US Code of Federal Regulations: Title 49, Transportation; Part 393.75.
* Exceeding the lawful speed limit is neither recommended nor endorsed. It cannot be used on 8.25 wheel.

FEATURES

EXCELLENT RIDE COMFORT

Wide, continuous grooves efficiently evacuate water to **maintain traction** and braking performance in wet conditions. Integrated stone-ejector features clear debris from the grooves to **prevent stone drilling** and safeguard the casing for **longer service life**.

EXTENDED TREAD LIFE

Wide 5-rib tread lined with full-depth wave sipes maintain consistent road contact for excellent straight-line stability and precise steering control. The uniform design also **promotes even wear** for **longer tread life** and helps **reduce vibration**, contributing to a smoother, quieter ride for coach passengers.

LOW NOISE EMISSION

Full depth shoulder sipes provide outstanding traction throughout the life of the tire and disrupt tread impact frequency, **lowering pattern noise** for a quieter environment inside the coach. The wide shoulder rib grants confident road contact for a **smoother ride**, supporting **long mileage and fuel efficiency**.
